CONSULTING SERVICES

We Prepare and Protect Your Organization

We are the Leading Trusted Compliance Partner for Organizations Nationwide
Because of the BTG Difference.

Our Focus

We believe a company focused on delivering sound solutions cannot focus on one service or technology alone, nor can it focus on one area of its lifecycle. At BTG, we pride ourselves on being experienced on all facets of the services and solutions in which we provide. Our consulting services and solutions are tried and true aligning directly with state and federal regulatory requirements and best practices.

Our Approach

We do not believe in a one-size-fits-all approach ensuring our clients engage with practical solutions and services that directly meet their individual needs. BTG's customizable Compliance Maintenance Programs provides organizations with an opportunity to select services based on need with flexible terms and competitive pricing, allowing our clients the ability to budget more efficiently and ensuring continued compliance with regulatory requirements.

Our Culture

At BTG, we recognize that the quality and reliability of our services and solutions are dependent on the expertise and experience of our employees. Our team background is comprised of former executives and risk management personnel from financial services companies and financial institutions. We provide continuing education opportunities to ensure our employees stay abreast of regulatory changes, industry best practices, and anticipated compliance priorities throughout the year. Employees hold globally and nationally recognized certifications within the professional services that we provide. As a result of our diverse experience and dedication to continued learning, our clients are confident in the level of expertise and practical knowledge that we provide during engagements.

Our Reputation

All service providers assert they are focused on client satisfaction. At BTG, client relationships and satisfaction are at the center of what we do. We support the commitment to our clients with the people we hire, the work ethic we promote, and guide ourselves with a discipline made up of tangible processes and tools. Our many long-term client relationships and references speak to our success.

**Our mission is to be your
organization's trusted
compliance partner.**
